Sensus participated in conference for weight loss management and Satiety

The Netherlands, April 29th 2010 – Obesity remains very much at the top of the social and political agenda, and food manufacturers must respond accordingly. Sensus participated in the Fi Conference on the 28th of April 2010 in Hilton Hotel Rotterdam, The Netherlands, to present new opportunities in satiety and weight management.

Today's consumers are increasingly aware of the link between wellness and nutrition. They are looking for those better-for-you products and functional foods. To cater to your consumers' health concerns, you want to produce tasty, healthy functional food products. Premium products with an attractive added value. The answer is inulin, the soluble dietary fiber from Sensus.

If you were unable to attend this conference but still interested in what inulin can do for weight management, please contact kim.van.der.vorst@sensus.nl or +31(0) 165 58 25 77.
